ECM & BPM

Lean Management mit BPM

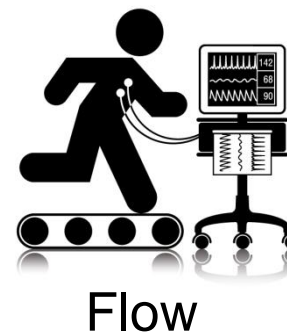

The image displays a collage of screenshots from the PROLOGICS BPM software interface, illustrating its application in Lean Management. The central focus is a form titled "Formular Reisekostenabrechnung von PROLOGICS/IGBrunner". This form contains fields for "Reisezweck" (Productpräsentation), "Kunde" (Vertico AG), "Reisedatum" (28.08.2013), "Abfahrtsort" (Linz), "Ankunftsort" (Wien), "Gefahrene Strecke" (221), and "Fahrzeit" (2h 30min). It also includes a checkbox for "Essenseinladung erhalten" and a section for "Automat. Berechnung laut Kartendienst" showing "Berechnete Entfernung" (182,95) and "Berechnete Fahrzeit" (01:56:51). Buttons for "Reisekosten freigeben" and "Weitere Belege einfordern" are visible, along with an "efficiency" icon.

Surrounding this central form are several other screenshots showing different aspects of the software:

- Top left: A dashboard with a navigation menu and a process flow diagram.
- Top center: A "Processes - Postfach - Danny Ocean - Microsoft Outlook" window showing a list of tasks with columns for State, Priority, Duration, Progress, Start Time, and End Time.
- Top right: A detailed process flow diagram with various colored nodes and arrows.
- Bottom left: A screenshot of a process flow diagram with a sidebar menu.
- Bottom right: A screenshot of a process flow diagram with a sidebar menu and a "Formular Reisekostenabrechnung" window.

efficiency: right here.
right now.
